

System i Expert Trevor Perry & KMR Systems select **WebSmart PHP** & **Nexus Portal** for Web Application development - See why!

"KMR Systems has adopted WebSmart PHP to extend our applications beyond the green screen. We are able to provide improved access to information in our existing application suite, through the browser, to multiple deployment vehicles, in much reduced development times."

Trevor Perry, CTO of KMR Systems Corp - IBM Vertical Industry Program (VIP) Member

"KMR is also developing new application modules with WebSmart PHP and Nexus portal for application frameworks, allowing us to extend our existing DB2, SQL and ILE RPGIV applications beyond their limits, without losing the investment we have already made. And with BCD's attention to training and support, rapid development is a reality."

Get to the Web faster with WebSmart, the solution thousands of RPG programmers succeed with. Only WebSmart lets you rapidly develop System i and multi-platform web applications with these choices:

✓ Develop in **PHP or ILE / RPG**

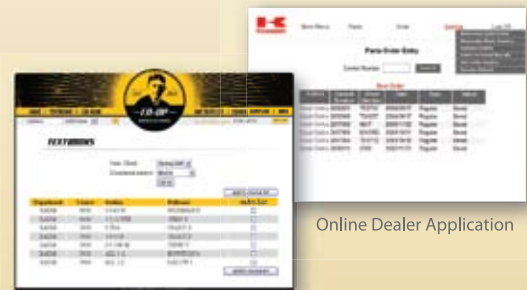

✓ Host on **System i, IBM Power Systems, Linux & Windows**

✓ Access **DB2, MS SQL & MySQL**

The advanced WebSmart templates, wizards and visual HTML editor do the ground work for you letting you focus on business logic. And, unlike some other IDEs WebSmart won't start you off with a blank slate. Plus, we'll include free licenses of Nexus Portal for Application Frameworks and SmartCharts for Executive Dashboards.

WebSmart PHP, WebSmart ILE & Nexus are components of BCD's ClearPATH Modernization suite that also includes:

- ✓ **Presto** - Instant web enablement of 5250 apps
- ✓ **Clover Query** - Real-time web queries & reports
- ✓ **Catapult** - Automated report and document distribution, and web archiving.
