

Beware of Bozo

JD Edwards® Implementations

Things can go sideways pretty quickly if there is any clowning around with implementations of JD Edwards EnterpriseOne Software. So it pays to choose someone with a proven track record. Rock solid testimonials from blue chip clients. And an unbeatable implementation team you can trust to get the job done right – the first time and at a price that will make your CFO smile.

That's what you can expect from Mid-Range – and that's what we delivered for Bill Schmidt of *PowerStream*, one of largest local electricity distribution companies in Ontario. Here's what Bill says about the JD Edwards capabilities of Mid-Range: "A big thank you for your team's support, commitment and dedication to make this past weekend's upgrade at *PowerStream* a huge success. We could not have achieved this milestone without your support and the tier 1 resources you put on this project. I can honestly say it was one of the best projects and implementations I have worked on in my career...well done!"

"Support, commitment and dedication"

Our end-to-end JD Edwards solutions include consulting, project management support services, training, classroom piloting, and productivity-boosting software products, such as *Data Access Studio* report writer, a breakthrough tool that allows you to easily access data and write reports. And don't forget the hardware technology behind your JD Edwards application, including hosting, high availability and disaster recovery. We can show you how to get that right, too.

Considering outsourcing your JD Edwards services or ERP applications? Nobody does it better than Mid-Range. Learn more by visiting our web site – www.midrange.ca. Then call us to request your no-obligation introductory consultation.
